Thread: [Change header color on shopify?](#)

alandashi - June 11, 2019, 12:07 pm

Hey guys,

I'm trying to change my header color for my shopify store.

I'd like to change it to look like this

I tried adding the following code in my theme.sccs.liquid file

```
Code header.site-header {  
  background-color: #f1ead9;  
}
```

```
.site-header__mobile-nav {  
  background-color: #f1ead9 !important;  
}
```

But it did not help.

Anyone got a clue what I'm doing wrong ?

A little update.

I changed the color, now I'm trying to add | between each section so Home| Shop | Contact us|.

To change the color i added this:

```
Code .container-fluid.single-menu {  
  background-color: #color;  
}
```

To add the | i used

```
Code .tt-desktop-parent-menu.tt-parent-box{  
  height: 40px;  
  width: 1px;  
  margin: 0 5px;  
  overflow: hidden;  
  background-color: #DDD;  
  border-right: 2px solid #FFF;
```

But i only get one | and my whole menus are gone.

Help ? ?

Put this is for loop where menu is created

```
<span> | </span>
```

Do you have a link for it?

Ganja - June 12, 2019, 3:51 pm

A link would help so we can see what your HTML looks like. But if you want to add those |'s with css only, it'd look something like this (the selector might be wrong because I dont know your HTML):

```
.container-fluid.single-menu a:not(:last-of-type) {  
  position: relative;  
  padding-right: 30px;  
}  
.container-fluid.single-menu a:not(:last-of-type)::after {  
  position: absolute;  
  right: 15px;  
  content: '|';  
  color: #fff;  
}
```

or, if you want it as a border:

```
.container-fluid.single-menu a:not(:last-of-type) {  
  margin-right: 15px;  
  padding-right: 15px;  
  border-right: 2px solid #fff;  
}
```

Thanks guys, however, i figured it out couple days ago. :)

Praise chrome 'inspect' :D
