Thread: [How much DATA do you use a month](#)

Banter. - June 11, 2019, 12:45 pm

On a monthly basis how much data would u naturally use on your computer, or are you still in the stone age having a certain amount of date you can use a month on your internet plan ??

within Last 30 days on just my computer - 345GB

If you dont know how to check that

Bottom right-hand corner > Right click into network settings > Data usage

Annihilus - June 11, 2019, 12:48 pm

Wow man 345g is insane! I do about 15gb of mobile data or a little less as for my pc haven't checked that lately but maybe around 30gb since I stream on it the most

Takehito Morokuzu - June 11, 2019, 12:48 pm

I think my Internet plan has a 700gb data cap. They did back in 2015 when I first upgraded to the fibre optic plan but I don't know if there still is a data cap.

Anyway I've used 325gb in the last 30 days just on my pc.

Bossk - June 11, 2019, 1:02 pm

181.84 GB

Would have to count in my phone and hackintosh too.

Sheep - June 11, 2019, 1:05 pm

Anyway I've used 325gb in the last 30 days just on my pc.

Do you download a lot?

I strictly game/browse on my PC and have 144 GB used last 30 days. I use another 12 GB a month on phone.

Takehito Morokuzu - June 11, 2019, 1:18 pm

My Web browser uses 82gb alone. I guess most of that is youtube. I download a fair bit but not that often tbh, it just adds up over time haha. I like having a local collection rather than streaming because streaming is too unreliable for me. My own Emby server is like netflix but better because it has your own collection. None of what I watch is on netflix, and most of the anime I watch isn't available on streaming services so downloading is a good alternative if one of the piracy sites decides to stop working (which happens all the time).

Oh, and I've used 64gb on my phone (on home Internet) and 16 on my mobile data.

Dotexe - June 11, 2019, 1:23 pm

Spoiler ([Click to View](#))

Frankey - June 11, 2019, 1:26 pm

Around 800gb the past 30 days. Quite a lot I think.

Thrift - June 11, 2019, 1:27 pm

On my laptop, I have 214.7GB

Desktop, 972.92GB,

iPhone, 21.3GB

This is all in a month (Last 30 Days)

Cocaine - June 11, 2019, 1:29 pm

Only 23gbs lmao I never use my computer anymore honestly.

SIM-4238503 - June 11, 2019, 1:50 pm

Damn man you consume a lot lol.

This month - 122gb

On phone around 15gb

Takehito Morokuzu - June 11, 2019, 2:24 pm

(Jun 11, 2019 01:50 PM)Host Armor LTD Wrote: ([CITE](#)) Damn man you consume a lot lol.

This month - 122gb

On phone around 15gb

Well I guess there is a reason that uncapped data exists, some people can consume several terabytes of data a month, or even more if their internet speed is good enough.

With a measly 35 megabit connection, you could download over 10 terabytes of data. ([Source](#))

Of course, many people have 200 megabits and beyond. Some have above 1gigabit.

Considering this, I wouldn't say that 350gb is a lot with today's internet.

Bossk - June 11, 2019, 2:24 pm

u do a lot of streaming i suppose

Thrift - June 11, 2019, 2:35 pm

(Jun 11, 2019 02:24 PM)Bossk Wrote: ([CITE](#)) u do a lot of streaming i suppose

I watch a lot of streams, host a local vpn, and a db storage I access from my laptop when out and about.

On my phone, I just watch a shit ton of Youtube.

Brendan - June 11, 2019, 3:49 pm

About 14GB for my laptop. I haven't been using it much lately since I've been working a lot.

ShinyThings - June 11, 2019, 3:54 pm

260 /month on my mobile

Not even going to check the computer lol

HexOrigin - June 11, 2019, 3:55 pm

around 250gb so far so id say 500gb for the month

sometimes have done over 1tb a month in data

Joel - June 12, 2019, 12:22 am

Total Data is similar to yours

324 GB

Debugger - June 12, 2019, 12:35 am

250 GB on my work computer

50 GB on my Laptop

15 GB my Android Phone

Not Exactly but you can say Average Data / 30 Days

Life - June 12, 2019, 12:38 am

I have unlimited mobile data. And just hotspotting off my iPhone I use about 600GB a month ~approximately sometimes only 300GB if I'm working weekends.. but yeah 500 - 600GB is the usual average that's without any huge downloads

Shelob - June 12, 2019, 3:29 am

i used about 300 gb last month, around 31\$

Cunt - June 12, 2019, 3:56 am

Damn.

71GB. Didn't expect it to be that low.

I used to hit around 200gb when i was like 15.

Phone is about 10/15gb.

Enzon - June 12, 2019, 7:55 am

200 gb this month,not too bad

SIM-3257834 - June 12, 2019, 8:36 am

199 GB on my phone, current is my only used item ATM.

In Crypto We Trust - June 12, 2019, 8:41 am

Downloaded many DBs this month, 450 ish GB.

Vagues - June 12, 2019, 12:40 pm

553GB

The biggest offender is Geforce Now with 489GB lmao

jonylameass11 - June 12, 2019, 1:35 pm

115gb this month,not too much

Alexed - June 12, 2019, 3:40 pm

about 32 gigs

I don't stream or torrent alot

CyberError - June 13, 2019, 10:18 am

40-50Gb On laptop

20Gb max on phone

if i had better Fiber connection i could easily reached 150-200Gb but yeh right now i use mostly serve web & Download Pdfs

webdev77 - June 13, 2019, 10:27 am

My windows data usage number isn't very high, but my network total is around a terabyte a month or so. That's almost all streaming and gaming.

Mr. Robot - June 13, 2019, 10:27 am

This was me last month

(which accounts for 0 torrenting)

martianhax - June 13, 2019, 10:40 am

(Jun 13, 2019 10:27 AM)Mr. Robot Wrote: [\[CITE\]](#) This was me last month

(which accounts for 0 torrenting)

it will take over 2 weeks to download or use over 60gb.. XD

Shuxas - June 13, 2019, 10:19 pm

I don't really get on my computer too much so I got like 0gb on my computer right now ,but I usually use around 50gb/m on my phone or more

Gasolina - June 14, 2019, 9:56 am

I use around 251-351gb per month mobiel data and 2TB-5TB on ISP

Froitlan ® - June 14, 2019, 3:48 pm

Last 30 days - 298GB

Once I used 900GB in a month, that was crazy though and a lot of people came over in that period so they probably sucked my data dry

Truthkillz - June 14, 2019, 8:10 pm

Lost month was 78gb of usage... On mobile.

Hello.v4.0 - June 14, 2019, 11:39 pm

Anywhere from 500GB-5TB on home internet. Usually less than 1GB on mobile data, I use it only maybe an hour a day and don't visit image heavy sites with it.

PrinceOfTruth - June 28, 2019, 7:50 am

I use a phone for internet so not that much...

Pronouncer - June 28, 2019, 7:52 am

1.8tb this month. on PC (Wifi)

On my phone 150GB (Mobile Data)

pubmaster - June 28, 2019, 8:00 am

It's usually around 1.5TB, but last 30 days only 650GB.

SwimmingPool - June 28, 2019, 8:10 am

Elweth - June 28, 2019, 8:25 am

Less than 100 on my phone. Nothing much.

Pawnhub - June 30, 2019, 6:36 am

Damn I got 409 GB of data I've used on this PC, on my work PC it's only 19 GB.

Winds - June 30, 2019, 8:44 am

[img=https://ibb.co/WPqW9Zb]

Holy shit that's a lot.

martianhax - June 30, 2019, 8:49 am

on my pc 600gb

on my phone 700MB

because we pay 0.1\$ per 1mb

Goku_6695 - June 30, 2019, 10:21 pm

300 gb of data usage. Yes 300 ha ha ha.

Agent Shark - July 1, 2019, 5:29 am

Ive used approximately 500GB on my PC and roughly 100GB on my mobile devices (iPad, iPhone, Apple Watch)

aloofarrogant - July 1, 2019, 6:36 am

Less than 100GB per month.

Fish - July 1, 2019, 6:47 am

Not too sure about my computer, but my phone roughly brings in about 3gb/month

EnchantedStorm - July 1, 2019, 7:52 am

94GB

I've been using popcorn time so much lmao.

Immy4you - July 5, 2019, 10:51 pm

1.5 TB in month of pc and phone upto 250gb

CostaRowsta - July 5, 2019, 11:07 pm

Well, I've currently been using my cellular device for internet and have been using about 38/40GB monthly. Not too bad.

Captain Pre - July 6, 2019, 2:01 pm

300-400Gb i would say. 4Devices share the same wifi tho.
