Hey guys. I found this application to make e-whoring, the problem is that I do not know how to take a picture of the gallery and that there is written next to "taken on the device" If you have the solution thanks in advance

You should keep the app for yourself if you don't want it to be saturated or well Idk it's your traffic source so it's your choice... honestly don't know about a way to post live on that app because never use it before...

But maybe you can try getting the traffic to add you on kik or snapchat and then send live on there because it's easily.

Hi, I have the same issue of the OP, i have no idea about how to fake a camera pic with this app. I tried with a fake camera app, but it only works with apps that don't use an internal camera. Any ways around?

Was really easy to send fake camera pic from there, was needed just a special version of this app but not working anymore :)

c2-anlik-hilesi-efe.com.tc - that was the name

search - FakePicture taking pseudo selfie - you need a jailbroken iOS device.

i'm still looking for the same thing in Android
