Thread: [How would I develop this website?](#)

HERMES - June 12, 2019, 3:36 pm

How would I make this website idea? And how much would it genuinely cost?

I need a home page that shows off what we do..

And then I need a tab that somebody can set up as a reseller..

With that being said, everytime somebody makes a purchase, they would have a wallet that they could withdraw their % from

This website will not do automatic performances, it will just take the money..
and I manually do the job per task..

Who can I contact? Etc. I already have a domain purchased.

So you want a webshop with a referral-system right?

Get fast hosting (never use godaddy for anything), install wordpress + woocommerce (check youtube-tutorials) and use a plugin like this:

<https://wordpress.org/plugins/yith-woocommerce-affiliates/> .

You can probably set this up yourself (look for a fitting theme/design on themeforest) or pay someone from Fiverr to do it for you, ranging anywhere from 50\$ to 1000\$+.

This is the exact type of reply I was looking for. God bless you sir! ?

I think just the theme configuration on server and linking with domain will not execute the affiliate process.

Better need to consult first and initiate further, Interested to discuss on same
