It wasn't showing up on the upgrade page , I think because I meet the requirements. I was getting told I need 100 rep and other things but the requirements changed to this

What are the Ub3r requirements?

Currently your account must be at least 60 days old, have 100 or more posts, and have at least a 50 popularity rating. If you don't meet all of these requirements then during the upgrade process an error will be display.
