Thread: [Duplicate PM's](#)

F11 - June 16, 2019, 4:10 pm

Everytime I get a new pm, it seems to duplicate the alert, making 2 for each new pm.

Anyone else experiencing this? The Alert system is buggy. Possibly disable it for PMs alerts since MyBB already has a PM alert system that works 100%.

Yessir. Will do.

kawaii - June 16, 2019, 4:28 pm

I don't experience this personally but I agree that PM alerts should be disabled since they are basically redundant.

Seems fine for me when receiving PM's.

I often get double alerts and one points to "invalid PM". Hasn't been a big deal and also doesn't happen every time.

Edit: Ah what the heck I'm just disabling PM alerts as it is redundant.

Spaark - June 16, 2019, 7:28 pm

I disabled PM Alerts via the UserCP a few weeks back. It works a lot better now :)
