Thread: [\[HELP\]-Ports are open but aint receving the victems on Cybergate \[HELP\]](#)

DreamH4X - August 8, 2010, 2:25 pm

Hello World

I am here today to get some help off of someone.

At canyouseeme.org the port 15963 is open to me (15963 is the port im using for my RAT)

But when i test it on sandboxed nothing happens or comes up.
i got the no-ip DUC on and everything is right.

please any an answers? ?

SIM-353284 - August 8, 2010, 2:26 pm

use port 80

end of thread/

when i portforward

is the start 80 and end 80?

Yep, I personally use 82 though

Bok1ca - August 8, 2010, 2:32 pm

Same i use 82 and everything is okay.

DreamH4X - August 8, 2010, 2:38 pm

Error: I could not see your service on 173.33.174.68 on port (82)

Reason: Connection timed out

on canyouseeme.org

but with a port checker tool it sais its open....

which one is right? :S

rocketmn333 - August 8, 2010, 3:50 pm

port checker is what i use, can you see me has given me problems in the past

Gibson - August 8, 2010, 4:37 pm

Have the client open when you check with Canyouseeme
and second

make sure your connection password is the same as your
server password!

David10214 - August 8, 2010, 4:39 pm

make sure firewall is off and port 80 is for web browsing don't use port 80.. use something other than 80

Viguroz - August 8, 2010, 4:42 pm

Disable your AV, turn off your Firewall, make sure your ports are open (Port 82), and verify that your No-IP is set up correctly.

Use Simple Port Tester to test if your ports are open. Also, I've heard of cases where some people cannot connect to themselves, so I'd have a friend test it out.

this helped a lot thank you :)

lolxmodzz - August 8, 2010, 5:11 pm

use port 82, 80 is really unstable trust me

bshades - January 2, 2014, 10:55 pm

If you need still help with the prob, contact my on skype: c3ll7n
