Thread: [Any working FAKE webcam software?](#)

nymns - June 18, 2019, 6:49 pm

I downloaded manycam, but it didn't work on Omegle.

Anyone know one?

Thanks!

<https://alternative.me/manycam>

There are many you can try. What works for one site might not work for another and I don't use Omegle.

None of the alternatives are at all relevant to the type of software I'm looking for, stop farming posts, lol.

If you bothered to look through the list more... <http://www.webcammax.com> is exactly like manycam with from I can see all the same features. But sorry I am just farming posts considering I post maybe once or twice every two months or so...
