Thread: [\\$15k+ made within 3 weeks just betting on raptors \(literally\)](#)

Kawhi is the goat. Only lost one time betting on the raptors and that was because KD was injured and ruled out of the game and i couldnt give up those odds.

Honestly i dont know why raptors were underdogs most of the time when i bet on them. They had the better team throughout the whole playoffs. I dont think i would ever make this free money again while betting

As a Californian, I was crushed on the outcome. However, good earnings on you man that's fucking dope.
