Very interested. Waiting on a review from someone.

Why would you need to sell a \$20 paragraph if you're making massive ROI with seemingly instant cashflow by trading assets in an educated manner?

Yeah I'll take 7 of these.

I'll gladly take a vouch copy and leave a review. I am pretty experienced with crypto trading but i normally do not with fiat.

I recently got banned from PayPal for doing what BitLoops taught in his previous e-book about the same thing. I asked for asvice a few months ago and got no reply.

Zied1953 - June 21, 2019, 12:02 pm

Is PayPal accepted as a payment?

mackmall - June 21, 2019, 12:22 pm

Is this the same method that you were selling before? If not, what's different? I purchased the other method and want to make sure it's something different. Thanks

There is absolutely no way you were banned from paypal from following my guide assuming you were using your own verified account.

Send a message and I can help you! You also don't need to use paypal for this if you don't want to.

Updated and now offering a mentoring service for it, if you want the updated guide free of charge send me a message! ?

What's in your guide that makes it worth paying money for it?

Exchanging is pretty straight forward. You buy bitcoins at few % under current value or at 1:1, then you sell it at a few % higher (usually 5-10% higher depending on payment method, fee's etc). You can either build a network of both crypto buyers & sellers through forums etc., or you can use websites that allows you to setup an account and place ads (like localbitcoins.com). From here on you're good to go. Depending on payment method you'd also want to make sure you can't get scammed (like paypal chargebacks, stolen funds etc).

Been two weeks since I messaged you about the updated guide and I'm still waiting for a reply. Can you get back to me please. Thanks!

mackmall - August 8, 2019, 3:30 am

Been over a month and still haven't gotten a reply to any of these posts or PM's I've sent. I would be pissed if I paid for the full mentorship package. Support is ZERO
