Thread: [Mobale Color Choice](#)

Omniscient - June 19, 2019, 7:58 pm

I'm considering creating a 2nd color choice for our Mobale theme. We used to have Modern Purple and Modern Blue. The current Mobale theme is based off the purple which is original HF colors.

But would members like to see additional options?

Vote in poll please.

Definitely green! Always works well with dark theme!

CRT - June 19, 2019, 8:46 pm

Voted for blue. I love the current theme, but I miss the blue one we used to have! ?

I agree, this would be pretty helpful

NoSuchAgency - June 19, 2019, 10:30 pm

I say green or blue would look good!

Deal - June 19, 2019, 10:39 pm

Come on guys. Why so few votes on orange. Are you gay?

Sick - June 19, 2019, 10:45 pm

Yeah it would be brilliant to have a choice of them all to be honest

But green has my vote

wrapper12 - June 19, 2019, 11:01 pm

Voted for yellow cuz it would be cool to finally see some yellow on here lol.

IncLom - June 19, 2019, 11:21 pm

Give us Yellow, it's color minded

iNviZ - June 20, 2019, 6:00 am

Orange would be bad ass for sure.

duplex - June 20, 2019, 6:01 am

Definitely Green, just the thought of having a Green HF mmm.

Dorrance - June 20, 2019, 6:02 am

Why not have a feature where users can choose there own?

Yeah it would literally make the most sense, it doesn't matter as long as users could choose their own colour, or even give them a # color list and have all the colours they desire.

Mudkip - June 20, 2019, 6:31 am

Wow, the amount of people who voted is so small...
Do people just not care?

01001 - June 20, 2019, 6:48 am

"None of the above." I think the existing color scheme is readable and helps a lot. However, change is the only constant and would always support new updates! ?

DOG - June 20, 2019, 6:49 am

I would love the green! Always liked this color and I think it will fit perfectly for the forum!

123 - June 20, 2019, 7:23 am

If anyone of you chose yellow, we can never be friends.

I would go with blue.

Indeed it would be a bit difficult to choose without some visual examples.

Shelob - June 20, 2019, 7:31 am

Blue because it's comfortable for the eyes.

Just a little something I threw together.

Unixroot™ - June 20, 2019, 8:37 am

Green or Blue would be great

Dragosthethird - June 20, 2019, 12:09 pm

Honestly, I would say blue. Personally, I like the sample Xerotic made.

This is very true.

On that note - yellow. I think a bright colour would contrast well with the dark theme. Blue seems to be winning, but we've already had a blue.

Omniscient - June 20, 2019, 12:22 pm

The version Xerotic has made on Knot looks pretty strong.

Let's get safety orange in here; turn this into an OSHA safe-space.

Voted for Blue! Others can't be compared to this.
