Thread: [I need private slot/sub crypting service](#)

**dump99** - June 21, 2019, 8:01 am

Im looking for good crypter with few users. I thinking about 40\$ dollar price. 1/30 or 2/30 detection (runtime , scantime) will be ok . I want also WD bypass. Contact pm.

If your public crypter is good you can also pm me. Any suggestions or advices write below.

**savaged.** - June 21, 2019, 8:05 am

\$40 is a low budget but I'd recommend Cyber Seal, it's the best crypter on the market currently.

No it does not and u should not be asking for a crypter with even 1 detection on refuds. Here pm me your skype discord or jabber i have a crypter i can use to crypt for u for some help with something

**SIM-3132187** - June 21, 2019, 11:00 am

You will not find crypter at 2/23 for 40\$ mate.

hm idk but i heard cyberseal offers someting like these results. What do you think in this issue ?

**SIM-3132187** - June 22, 2019, 8:55 am

I think it's impossible. Maybe it can do it on run4me or dyncheck with fake scan. But in the reallity, with internet on, it will be at 11/23 something like that.

Well, if you use research and time, technically you can make your own stub for free.. That's personally how I crypt, I'm planning to release a free guide for crypters soon, not some .NET or Public Stub stuff, I'm hopefully going to be releasing some of my personal stubs and methods on how to crypt files completely free.. Runtime AND Scantime FUD.. In the meantime if you want a FUD Native Crypt for free, just PM me.. I hate everyone selling there stubs for \$100+ its so easy to learn and just make your own, or better you can just modify a public stub to ReFud it.

Honestly, I've sold in the past on another fourm, 0/23 Runtime FUD on Dyncheck with FUD guarantee checks, so people can make sure there file will be FUD before buying.. Guess how much... \$10 per Crypt and 3 Refuds.

I am a bit skeptical, if you can send me a rat encrypted with your stub at 0/23 on dyncheck I would be really interested.

Sure mate. My Jabber is:  
RunPE@exploit.im

As I cant PM just yet, feel free to add me over there until I can PM you. Also, send me your RAT and then you know I'm sending you a legitimate file if you like?

What is a "pm" and what is a "discord"  
as you all say here ??

**RunPE** - June 27, 2019, 7:13 am

PM = Private Message  
Discord = A Chat Application like Skype, but its highly insecure and personally I think no one should use it for anything on HF.

thank you, friend,

I understood perfectly ... I need a tutorial on Razor  
to encrypt Professional-8.0.0  
Free version ... please
