Thread: [Why BAT price staying ?](#)

RbK. - June 21, 2019, 11:32 pm

Hello,

I was wondering why the Basic Attention Token (BAT) price don't go up like other crypto ??

Not bad volumes, listed on coinbase, really good project and price really correct for the number of coin

?

Zamper - June 22, 2019, 1:47 am

Its a good project , don't look at current prices. It will eventually rise. It is not rising now because all are with the eyes on BTC because it broke 10k with volume so traders are not touching BAT yet, nothing to worry though, good projects will profit you on long term.

I just lost 50 BAT because of a browser fuck up, didn't recover the key so fuck it.

BAT is a very nice coin, just give it time.

Keep buying on low's and eventually (/ soon) you will get an easy profit.
