Oh definitely, but in the grand scheme of things I'd still say "soon".

The halvening is less than a year away now.

Shelob - June 22, 2019, 1:16 pm

Maybe it could happen in 5 years from now, who knows.

sAVITAR - June 22, 2019, 1:19 pm

Looking forward to seeing how everyone reacts to this, last time BTC got on the hype train everyone jumped on it.
Considering investing some money in BTC and see what I can get out of it.

Funny, I just sold all my BTC. This rise is so over-reaching, correction is going to make every grandma and institution shit their pants.

I think you'll regret selling out so early :)

Snoopis - June 22, 2019, 2:28 pm

The chance of a bull run right now are high since the momentum of BTC right now is a lot faster than the previous year BULL run which was in 2017. If you just do some simple tech analysis you can see that the time that took BTC to go from 4000\$ to 8000\$ in 2017 was about 91 days and now in 2019 this took only 41 days. I believe this means that if the next bull run happens it will be much faster and will go past that 20k ATH easily

I don't know if he realizes a year from today will be more than a month after the next halvening, bitcoin will veryyyyyy easily be past \$50k.

I don't actually want him to delete his account, but this friendly bet is exciting nonetheless :)

How much of your portfolio do you have in BTC if you truly believe 100k/coin is in sight, and you're confident 50k/coin within one year's time span?

90-95% for coins
50-60% overall (stock/coin)

I am by no means expecting to get rich off Bitcoin. That train has long long surpassed anybody who wasn't already in Prior 2017 bull run.

My motherload is over here, which is up 400% and climbing in the last 3 months:

I just put \$4k more into it. You guys are too stupid if you don't jump on this opportunity. I got my stop loss already set and I'm laughing my way to the bank with my stack <https://prnt.sc/o719gu>

MegaByter - June 27, 2019, 1:40 pm

The beautiful thing is that you just neverk know. I had a strong feeling, as I posted, around a month or two ago that BTC will hit 10k , and it did just that, but I had no idea it would damn near hit \$14k as it did as well.

Your guess is as good as ANYONE's.

My guess is that it will be worth 10 trillion a coin
