Anyone can hack the admin on the forum i joined? He is a coder (i think) And he is a youtuber and he have his own website that you can download his gta 5 online mod so i was wondering if you can hack his password maybe i can hack his paypal account too because 5months ago i remembered his old password and i manage to try it on his paypal account and it worked..so i buy games,pc and more..

So if someone can hack his password well we can have some money and buy what you want. And i also have his email so yeah just comment here or pm me if you want
