Can you read facebook and instagram messages with Spynote?

aleeminator - October 23, 2019, 2:21 am

is there a tutorial to build it?

Who cares about the older version??

W0lf already posted CLEAN reliable version, that should be enough... Who knows what virus is hidden in your files :/

So does github, WTF is your point?

Why should we trust you when its openly and freely available from valid sources????

w1l5t3r - October 23, 2019, 10:24 am

Clean as you stated on your webpage and youtube ?

Thanks to everyone that posted sources or clean links about this topic. I'm kinda surprised there are very few public posted.

Sell modified software for SpyMax and Raw Server

Its features are hidden in Android 10 and 11

Prevent killing the server and running it automatically

Permanently delete the server

\$ 300 my last price

This is the last talk

No, it is not expensive, these features will never be found by anyone

Advantages

Server kill prevention

Prevent uninstalling the server

Server supports in Android 10 and 11 are hidden

Background cleaning does not get killed

Lasting hold

I am not good at English, I am Arabic

I am a programmer in the Thunderbolt organization,

You can uninstall it from SpyMax by uninstalling it

But it is not the phone

This is easy and has no problem

These are features that have been injected into the server and modified SpyMax

Yes, it is the best at all, and it is more powerful than the botnet

@Wesam_Abdul_Hakim beware of this guy he is a scammer he scammed me for 200\$. He has also scammed other people from different forums, telegram and from other sources. Dont fall for his trap. Once you pay him the money he will send you a apk ransom/malware/anyfakeapp and then he will instantly clear all the telegram chat history and will directly block you and delete the chat, so that no proofs can be left against him. This is how this assh*le work. Everything is a fake and scam from him he has multiple account on hf with different names safe your money dont at all loose your hardearned money to this shitty scammers

Hello,

is there actually any working methode ? Sending apk with email or facebook-messenger isn't possible. Also anti virus porgramms detect the apk

best regards
