Thread: [Whats up with all these colors?](#)

Compulsive - June 24, 2019, 3:09 pm

I must have been in a coma for a while, but I just got back to HF recently and I was wondering why there are like 8 million different colors for names, and how that works?

I know
vendors are dark green
uber is blue
reg groups is white
l33t is yellow

but what are all the new ones? I know divined has been around for a while,

but why this new like gray, orange, red?

Why are there new colors now?
