I paid 80PM for the smtp/webmail all domain inbox, below are what I've discovered.

- 1: The smtp/webmail does not deliver all domain inbox with or without adding a composed message
- 2: The smtp/webmail according to him should be 1k email leads per day; if it's 1k email leads per day then how can i send 300k leads in 1 month? this is questionable as he didn't state this during the transaction. Otherwise; sending 1k-2k per day will only result in sending less than 100k within the 1 month period.
- 3: I registered a domain for it as requested but he said the domain was blacklisted which wasn't (wiizp3r.com) that's why it didn't send inbox, he later bought another domain himself and it didn't resolve the issue of inbox delivery.

my resolution: I need a refund if I can't use the webmail/smtp for 300k email leads inbox on all domain expecially office 365 leads.

Thanks

Off topic: Do you buy office365 users and pass?

If yes i can supply you .
