Can you stop spamming this section, no one cares about this 'cheat'. You're not doing anything original, tonnes of people used to do this.

I dont get why the hell hack forum staff still allow this scammer to spam the section advertising his shit decemption paste.

He's literally spamming this section since days, he's even trying to sell it advertising that it works on faceit /esea, cause he can't get any sales even with the invite only option. Also he can't even buy a sticky as everyone do, bypassing HF rules.

It's been pretty obv for a while now.

Shoot out to everyone: stay away from this scam.
