Thread: [auctining off my ovh qbot bypass](#)

DickFace - June 26, 2019, 10:03 am

bid: couple bucks

bin: a few bucks (oh yeah)

all info in title

int - June 26, 2019, 6:20 pm

wtf is an ovh qbot bypass

PoisonForce - June 27, 2019, 11:18 am

I think OP is selling code for a OVH bypass method for the QBOT botnet malware.

BottGott - June 27, 2019, 2:49 pm

OVH can easily tank raw UDP & TCP attacks, even if you're using some odd payload that requires little traffic to down a host it can more than likley be easily blocked once they discover it.
