Elweth - June 29, 2019, 7:52 pm

Seen people selling this ever since it was taken down. Why buy when you can get it for free?
In case you're unaware, DeepNude is an AI to generate nudes of any pictures. Ever since the discovery by media, the owner closed it down to prevent abuse.

Just reply to thread AND send me a PM and I will get you the DL link.

PS: Feel free to close and junk this thread if its against HF rules, not sure whats the ethics behind this ?

EDIT: For those who have previously PM'ed me, I provided the wrong link. PM me again to get the premium version, sorry!

Edit 2: You need Windows 10 for this to work!! ?

I'm pretty curious, I will send a pm.

Pope - June 29, 2019, 10:23 pm

This doesn't seem to be DeepNude Premium as stated. This program WILL alter the image but it WILL also have a watermark applied that pretty much covers everything like the example photos of the DeepNude program.

I know this probably doesn't need to be said but this isn't a one stop shop. To get a half decent DeepNude image, the source image has to be very clean with plenty of exposed skin or else the output image is pretty garbage. Even with an optimal source image the alterations are still pretty bad. More often than not, the alterations are pixelated and has serious artifacts. Nonetheless, it was interesting to see how it works.

Shhh, only got 50+ users right now. Gotta keep my FUD rat lying low.

Jokes aside, its good practice to scan and run in Win10 VM.

You should never just hope. Take the necessary precautions instead. It runs fine sandboxed in a VM.

greenskywalker - June 30, 2019, 3:46 am

I've just tested this out! I won't say that it works good but as a fact that it's one of first apps like this I am just impressed that technology went so far, maybe too far and our world ain't ready for it yet but definitely worth to try it out. Just be aware that it's far away from being perfect and sometimes titties are placed in a retarded way lmao

It works, but it is far from perfect.

The input photo must be very similar to the ideal format, or it'll generate something ridiculous.

And 9/10 times the vaginas are very pixely.

I got the tool from op and it works, it's performance isn't stellar however. I find that it only looks "correct" with certain images and that even in these circumstances it is notably fake. Amazing that we can do this kind of things with a program, but not amazing results on the final product.

In case you're unaware, DeepNude is an AI to generate nudes of any pictures. Ever since the discovery by media, the owner closed it down to prevent abuse.

Just reply to thread AND send me a PM and I will get you the DL link.

Why haven't i received it yet? Because of my profile? OP this is very unfair

That's the whole issue, it doesn't work.

Only very specific pictures can be AI generated and even the most obvious will fail often, the software is legit crap idk why it gets this attention online.

Also it looks very fake whatever is succesfully generated, really ain't worth it, idk how those pics online look so legit but they aren't made with this that's for sure.
