Is it a gambling method? Or it has anything to do with gambling? Also what is the payout method. Only btc?

123 - June 30, 2019, 4:31 am

I can confirm this is gambling just by looking at screenshots posted above.

OP can you confirm this involves gambling through Dice Game ?

If it's that, I have tried it and house always wins when autobetting for a longer period.

If you want to earn \$500 a day. I'd say you would need a computer/mobile phone to run all day without interruption + \$1000 as investment.

I just made \$35 doing nothing the past 15 minutes ya'll.

this is definitely gambling then, so there's a chance that you can lose all your investment.

Here is my experience with this:

I was able to 2x my small investment following the instructions in the book in an hour. However, there is a chance that you might lose your investment or part of it too. With some cleverness, perhaps you can minimize the risk which OP has not mentioned in the book.

I felt this has a time/profit tradeoff. If you are very patient and want low but somewhat guaranteed profit, you can leave it running and check back after a day or so. 99% chance that it would have grown by some percentage.

I dont think this is worth the price of \$75 since it comes with a risk of losing what you invest (no matter how negligible the risk is). Also, for this to be auto-pilot, you need to keep your computer running.

The instructions were pretty simple to follow and OP was really friendly and responsive throughout.

Goodluck to anyone who is buying this.

Trite - June 30, 2019, 7:29 am

Completely agree with the purchaser above me. Nothing new same gambling methods that's been going around for ages. This is by no means worth \$75. I would rate this around \$10-\$20 at most. You can make money with this, but you need luck and patience and to be smart enough to pull out without being greedy.

Mastermind's Official Vouch Copy Review

After trying out the method for a full day, I can vouch for the eBook. Yes it is a gambling method but the profit you can make is insane if you plan it smartly.

If you deposit 100\$ and you want to play it safe you are looking at a 70\$ Profit /Hour.
With the safe method it is unlikely you will loose your investment (Although always gamble money you are willing to loose, gambling is still gambling and there will always be a chance you will loose your investment even if the percentage is low).

I tried different approaches from high risk to minimizing the risk.
With the high risk I got 400\$ in an hour with just 100\$ Deposit, then I lost as I was unlucky and was willing to take the risk to try out the chances.
After I Invested another 65\$ and took the safer approach where I receive around 70\$/Hour profit and still going after 2 hours.

If you are a person which is not greedy and know where to stop this is for you. I think you could approximately counting unfortunate losses make around 500\$ - 700\$/Month.

Yes the eBook is a bit pricey but if you know how to handle it you will see profit.
OP will be happy to assist you with any questions or tips you need.
The eBook is very well explained and even a monkey can follow it ?

Short Summary

Support delivered by OP: 9/10

Risk involved: 7/10

Possible profit: 6/10

Thanks for trusting Masterminds for your vouch copy.

It is gambling and the last few reviews all agree that you can lose your money.

Even one of the reviewers did lose the money they made.

Please notice that this was taking high risk. Using the low risk has been running for 4 hours now and counting the 100\$ loss i am still 200\$ in to profit right now.

The loss really depends on how greedy you are, i am taking almost no risk now and more or less 60\$ - 70\$/HR.

Kind Regards?

Tokyo - July 1, 2019, 12:44 am

I received a copy of this method to review and will be posting my thoughts below.

To clear up any confusion, this method involves gambling and an investment (don't expect to not lose money). Based off of my results thus far, the higher your investment, the faster you'll be making your ROI + profit. I have experimented with \$15 and found that you're more likely to lose a small investment than a big one.

It's risky as with any gambling method, but the money you make and the setup time will be worth it. Don't let your greed get to you however as you'll lose all of your earnings in a minute. I followed the exact instructions shown within the guide and received 2x my investment in about 1-2 hours.

I also agree with the other reviewers that the price point is fairly high and should be lowered. All in all, this method has my approval if you're patient and willing to take risks.

sadfire - July 1, 2019, 2:34 am

I'm happy that the vouch receivers we're able to make some profit atleast.

But I won't be lowering the price soon. I might even raise it considering the money I make with this.
AND THE MONEY YOU CAN MAKE USING THIS!

The ebook requires common sense and money that's literally the only thing you need.

Shut the fuck up lmao. You didn't even read the thread.

White - July 1, 2019, 11:02 pm

I bought this and this is my review:

Method is straightforward af. There is 5 simple steps to follow in the book + some tips and notes to make it incredibly safe to use. Yes, I can confirm this is a gambling method. But it's pretty hard to lose money with this method if you follow his guide carefully especially if you take the slow and safe path. I'd say this is the most safest way of gambling. He also shows his earnings and settings in the ebook. I've made \$90 doing this for 3 hours. I got almost +50% ROI in just the first day and I can see how this would generate you insane amount of money.

For the price of \$74.45. I would say it's fairly priced as how this method can net you thousands of dollars a month. It may not be affordable for a beginner but it's still a great ebook.

Overall: 9/10

Best of luck to OP and his ebook!

I am interested but to said that you would need an investment of about 1000 for a 500 a day profit . But reading the reviews some people make 60-70 an hour profit multiples by 7 hours at least that is 420.

If you want to automate this process, I highly recommend an investment of 1000. I don't mean that 500 a day is what you make most with 1000 investment. Sorry for confusions.
