Does this still works ?

Because i don't have "import snaps from camera roll" in my memories settings

Maybe it could work if i install a an older snapchat ?

thanks

Get AtroSnap. Nothing else to it man.

Last1g - June 30, 2019, 8:02 am

you don't have to imoprt those snaps from memories, now follow those steps and it will works

1. import ur snaps to your story
2. save the snaps when it uploads then delete it faster so ppl don't see it
3. go to your snaps (not camera roll) and u will find the video/pic that u saved
4. upload it and boom it will look like its a live snap

this method works for me these days , but sometimes it don't u just have to stick on it and try it multiple times

BONUS create a private snapchat story and add another account (create another one) on it so you can test if that snap is live or not, if yes then uploade it on your story.

Peace and love
