Thread: [Does WarZone work with CyberSeal?](#)

Ramcharan - June 30, 2019, 8:46 am

Hello, so i'd like to buy warzone, i would like some opinions about it and tell me if it works with cyberseal

n0\$f3ratu\$ - June 30, 2019, 8:51 am

I don't see why shouldn't as long as the injection in it self is used.

You should ask the owner however.

He is the only one who can tell you 100% about compatibility.

Stella - June 30, 2019, 8:54 am

i mean kinda, it does work. But the owner is extremely strict. I literally did one thing wrong accidentally and he revoked my lifetime access.

Ill personally advise, (PERSONAL OPINION), against purchasing Cyberseal and go for different routes and options!, if you need any help feel free to PM and I can provide you links to AMAZING native crypters!

tl;dr: dont buy cyberseal, support is trash - go for other native crypters.

martianhax - June 30, 2019, 8:54 am

no, warzone has its own crypter.

i tried warzone with different crypter but they never work.

warzone made his rat work only with his crypter.. smart so we are forced to buy his crypter ;p

Use some other crypter than Cyber-Crap Sealer-.

Too many issues with my clients using this. I recommend DATA Protector but you must ask the author if its compatible.

It has way more features and its easy to get establish FUD. ?

translation : i am a complete idiot who shitted all over cyber seal`s tos and tutorial multiple times , when my license was temporary banned, instead of apologizing to get it unbanned, i went ahead and sales thrashed like a stupid kid and made my temp ban permanently and still can't get over it after a long time.

Ps: you should be posting from your original profile

<https://hackforums.net/member.php?action=profile&uid=3560799>

ps2: is there any product you dont complain about?maybe you should get a mirror to find out where the problem is <https://gyazo.com/6c12994cc01403a38ba7b06d164a999f> little whinny bitch

Solmyr - June 30, 2019, 4:55 pm

CyberSeal is compatible as far as I know, last time I checked it was all right!

WARZONE is compatible with most crypters.

Since this isn't your stupid "sales thread" or "support thread" that you always believe you are superior than everybody and a dick to people who are trying to figure out your retarded cryptor you can put your opinion in your own thread. Not trying to sales thrash anymore since im a better person i rather have people not deal with you.

Good Day I Said

You both must have brain damage or something, cyberseal is one of the best crypters here whit the best support, I bought years ago and 0 problems. Of course if you act like an uneducated kid and break the tos you will be banned.

i personally don't like it, despise it in fact. you definitely don't get fuds all way through and support is trash.

apologies! ?

you never "temporarily banned" me lol, you straight up permanently banned me and blocked me on skype. So you lying about that is low.

you think your superior and have power over everything, how about you take my personal opinion and stop being an emotional bitch. one of the worst crypters I've ever come across, I can definitely say there are so much better crypters than this one being run by an ignorant shit like you canceling subscriptions and wasting peoples money.

do
not
buy
cybershit cyberseal
