I loved when Reviewers were around. I believe it was a group Omni started and found members for. They would give a solid rating on an ebook, not just all 10/10. I heard that they were coming back around a while back, but not too sure what happened. Any chance of them coming back? I really liked the concept.

A lot of ebooks on HF are absolute crap, and they would say it. Obviously, there's good material out there. I was just wondering.

I guess Appraisers are also based on the same concept. Although there were few spicy moments where they received criticism for false reviews.

You can see their work by looking at their Member's posts.

Why would anyone want a review on an E-book ???

All ebooks are pure 100% shit

This is accurate. Waiting on a good E-Book which will make you money.

Sure, they can tell you how to do something but it's never anything unique.

Anyone buying a money making ebook deserves to lose money. Immature little shits.

I doubt they'll come back, at least not for awhile. It's hard to find members for and even harder to trust them.

Anyone selling money making ebooks are pretty low imo. Just scamming kids on their ambition.

Sounds like a good idea but I think that they are busy doing other things than reviewing eBooks.

Idk, there could be quality content in there. I know what you're saying though, like why not learn it on your own? At the same time, it was nice to have the Reviewers group to call a spade a spade. Just mark it down for a cheap price with quality content is my thing, but then again I'm a legit marketer.

I have to object.. SOME E-books is actually worth it. Not all is 100% fake (but I belong to the 0.001% i agree)

I really enjoyed the reviewers as well. I appreciate those groups that did a lot for the community such as HJT.
