Know the method. Definitely worth it if you create multiple accounts to sell or share with friends.

Good luck on sales OP

Will this require any verification? Is there any chance the currency will be removed from account? I am trying to save some money so I am down to live off of subway for awhile!

no verification

yes chance, hence 24hr warranty. would not advise you to "stock up"... method will probably be patched soon, idk what will happen to the accounts. Not sure how they would be able to ban all the accounts that abused this method but we'll see.

well i meant where you cant open the app unless updated to latest version. as other apps have done that before as leaves no option then.
