Un-official Review 5/5

==

Quality of GUI: Amazingly noob-friendly, yet looks very professional. Everything is self-explanatory and easy to see. There is even a section where you can report any bugs straight from the keylogger, which is very helpful.

Rate 5/5

Ease of Usage: Very easy, in relation to the GUI, everything is very easy to find thanks to the sidebar. The keylogger also has an AMAZING feature in the self-cryptor which will allow it to stay FUD, which saves the trouble of finding a separate cryptor. The spreading will also be very easy, because its both scan-time and run-time FUD.

Rate 5/5

Easy of Vaccine : Infected yourself? Not a problem, simply use the built-in injection with the keylogger, and it will instantly rid you of the pest. I rate the vaccine 5/5, just because of the fact that I've done every possible situation for it to screw up yet, everytime it detects and deletes the keylogger from the system.

Rate 5/5

What you're paying for: On top of everything I stated earlier, you all those little things that make the keylogger absolutely flawless, small things like [ALL BUILT-IN]: File Binder, Remote Downloader, Pumper, Mutex [to prevent infecting same person multiple times], Log mouse clicks, P2P Spreader, MSN Spreader, LAN Spreader, USB Spreader. AND MORE!

Rate 5/5

Bottomline : Probably the best keylogger I've seen on this site, amazing for its price as well. The features this keylogger has are, it seems un-ending. I was also a beta tester for this keylogger and can assure, the coder "Classical" has worked his ass off to make this keylogger what it is today, so stop reading and get to spreading !

Rate 5/5

My recommendation: A++ go buy it now!

Samuell - August 8, 2010, 7:50 pm

Thanks for the review mate, I'm online MSN, as is my sales rep.

Topper - August 8, 2010, 7:53 pm

Hooray! Just got my copy, haven't had much time to play with it yet, but it is a MAJOR improvement from the Hidden Iye Keylogger!

Great work!

Samuell - August 8, 2010, 7:54 pm

Ex0z - August 10, 2010, 2:27 am

Yeah its working well already got me some logs, nice support as always only thing i dislike is the gui design im sure as this advances so will the gui much like hidden eye did, thanks.

zSwag - August 10, 2010, 6:59 am

(Aug 10, 2010 02:27 AM)J U i C Y Wrote: [\[CITE\]](#) Yeah its working well already got me some logs, nice support as always only thing i dislike is the gui design im sure as this advances so will the gui much like hidden eye did, thanks. Yeah the GUI is quite simple and isn't too appealing. If there are any GFX artists out there that would like to design the next GUI, simply message one of us :)

status quo - August 10, 2010, 7:56 am

Mhm , greatest keylogger on this site by far.

I recomend this keylogger to ANYBODY , it's both noob friendly and advance at the same time . Amazing , Classical also provides amazing support and helps you step-by-step.

rolandpg - August 10, 2010, 8:14 am

It's work with Cybergate ? (crypt without corrupt).

garvkapur - August 10, 2010, 9:50 am

Can you show me a screenshot of some real logs?

Also, can you tell me what EXACTLY will it show in the logs when I type the below:

[CAPS]hello[CAPS] [Shift]h[/Shift]i ~!@#\$\$%^&*()_+ haxking

and then point my cursor next to x (in haxking) and do a backspace and type 'c'?

Samuell - August 10, 2010, 10:37 am

(Aug 10, 2010 09:50 AM)garvkapur Wrote: [\[CITE\]](#) Can you show me a screenshot of some real logs?

and then point my cursor next to x (in haxking) and do a backspace and type 'c'?
Let's assume you're typing that into a blank notepad shall we?
Code |--Untiled - Notepad --|

HELLO Hi ~!@#\$\$%^&*()_ hacking

garvkapur - August 10, 2010, 10:39 am

Are you sure it will show you "hacking" and not haxkinc? (backspace one digit and then type 'c')

Samuell - August 10, 2010, 10:43 am

(Aug 10, 2010 10:39 AM)garvkapur Wrote: [\[CITE\]](#) Are you sure it will show you "hacking" and not haxkinc? (backspace one digit and then type 'c')

It uses an advanced algorithmic backspacing system, it gets the text of the current element you're typing in to, then it finds the location it needs to edit in the logs.

Teh Wallhacks™ - August 10, 2010, 11:23 am

This program is awesome

Way better than Hidden Iye

I had some problems having it not update and he got them all sorted out

Thanks!

Samuell - August 10, 2010, 11:40 am

Just thought I'd post this here, since NaDe Jr originally posted on my other thread :).

Unofficial Review

[IMG][http://i27.\[censored\].com/2551kdu.png](http://i27.[censored].com/2551kdu.png)[/IMG]

Now many individuals think Keylogging is all about getting free shit. But whats free shit that will only last for 24 hours? It's about consistency, one of the qualities this keylogger does not lack, Classical took the time to make sure the logs being sent via email were clean & reliable, he wanted to avoid any potential complaints, I received the privilege of Beta testing this software, I tested everything from Stealers to File Binding etc, and from experience, I have the utmost confidence if you purchase this software you will not be disappointed.

Quality: 5/5

[IMG][http://i30.\[censored\].com/975usp.png](http://i30.[censored].com/975usp.png)[/IMG]

It is so simple to use a caveman could do it, the GUI isn't perfect, but everything is organized & ready, ensuring your server compiles successfully. Of course there is always room for improvement, I will have to dock you some points, because IMHO, everything would be a lot more noob-friendly if certain settings weren't pre-ticked, as this may confuse certain individuals, causing them to lose track of what they chose, and what was already chosen for them.

Ease: 3.5/5

[IMG][http://i28.\[censored\].com/2i27fah.png](http://i28.[censored].com/2i27fah.png)[/IMG]

I'm not going to lie, the GUI could use a lot of work, and IMHO you should make the tabs horizontal, but that suggestion isn't of to much importance at this current time.

Layout: 3/5

[IMG][http://i25.\[censored\].com/1t39cj.png](http://i25.[censored].com/1t39cj.png)[/IMG]

No grammatical mistake I have witnessed in your keylogger, but I did notice one in your "Closed Beta" thread. In the future please remember Bellow is the deep roar of an animal, and below is under or lower, you seem to have them a bit confused ? (no offense). Now in terms of the logs, no keys are excluded, I remember you had begun to discuss "GetASyncKey()", and how it could ruin the logs. If one of the individuals you had infected were typing to fast, the logs would be broken because certain keystrokes would not be detected. You had explained you alternative (will not reveal it), which would log all keys without fail, this is evident in the logs.

[IMG]http://i31.[censored].com/1z686c3.png[/IMG]

Without a doubt, it may be the most unique keylogger you will ever find, especially in terms of features, for example a nifty component known as "Specific Keylogging", it plays a role in keeping your logs clean, as well as only logging what you desire. On top of that, it has a built in file binder, crypter, remote downloader etc. Not to mention the vaccine can kill said infection perfectly if you choose to test it on yourself, from what I've seen it doesn't even matter what settings you use, it was programmed to be flawless ?.

Originality: 5/5

[IMG]http://i29.[censored].com/n3oy7b.png[/IMG]

In conclusion if your one of those individuals who are desperately searching for a tool that can ensure your spreading is successful, you have come across the right one. And in terms of the prices, they are fair, mainly because your paying for the quality of the keylogger. At the end of the day it is up to you the buyer, hopefully I have you convinced. And Classical, I wish you the best of luck with your sales, you have my vouch.

Samuell - August 11, 2010, 1:04 pm

I'm back online everyone :).

Asus - August 11, 2010, 1:13 pm

Tested the keylogger and its pretty ok althought it lags your PC once activated. Hope it can be solved.

Samuell - August 11, 2010, 1:21 pm

(Aug 11, 2010 01:13 PM)Asus Wrote: [\[CITE\]](#) Tested the keylogger and its pretty ok althought it lags your PC once activated. Hope it can be solved.

Disable data.db stealer, that should solve the lag.

If you want absolute stealth, disable all Stealers.

BlackSn0w - August 11, 2010, 3:40 pm

Kaspersky Internet Security 2011 is still detecting it (Run-Time) as a Trojan even with the latest update (1.1.6) :(

Samuell - August 11, 2010, 4:02 pm

(Aug 11, 2010 03:40 PM)BlackSn0w Wrote: [\[CITE\]](#) Kaspersky Internet Security 2011 is still detecting it (Run-Time) as a Trojan even with the latest update (1.1.6) :(

Bleh KIS is officially on my list of most hated anti-viruses, I'll keep working on it mate.

Samuell - August 11, 2010, 9:41 pm

Alright I just want to re-illiterate this.

Do NOT under ANY circumstances upload your server to VirusTotal.

With that being said, I (as the coder) uploaded a 60% unique stub to VirusTotal simply because they are indeed the most updated/best online scanner around and there have been FUD issues lately, here is the result.

(New Stub, will release tomorrow)

<http://www.virustotal.com/file-scan/report.html?id=a746073edd8e16b205b083fc15b5562499cf6abec4367dfdb5157be66d3c2cc7-1281590635>

So please, for the love of god, don't upload it to VT because you think NVT is outdated.

Thanks, and expect a new patch tomorrow.

roboracol - August 11, 2010, 11:02 pm

HUGE VOUCH for classical,i love hes work and hes keylogger is just the best,FUD and works so great,cant complain bout it,VOUCH :D

Ex0z - August 12, 2010, 4:15 am

What your paying for: On top of everything I stated earlier, you all those little things that make the keylogger absolutly flawless, small things like [ALL BUILT-IN]: File Binder, Remote Downloader, Pumper , Mutex [to prevent infecting same person multiple times] , Log mouse clicks, P2P Spreader, MSN Spreader, LAN Spreader, USB Spreader . AND MORE!

Rate 5/5

Bottomline : Probably the best keylogger i've seen on this site, amazing for its price aswell. The features this keylogger has are , it seems un-ending. I was also a beta tester for this keylogger and can assure, the coder "Classical" has worked his ass off to make this keylogger what it is today, so

stop reading and get to spreading !
Rate 5/5

My recommendation: A++ go buy it now!
Figures. Only give it a 5/5 because you get it free.

Samuell - August 12, 2010, 10:07 am

Sharkey, don't hate on my positive reviews :).

(Aug 12, 2010 08:52 AM)Asus Wrote: [\[CITE\]](#) Classical, check the SMTP settings part, if nothing is entered and you try testing "Test SMPT" it gives you some code errors.
What did you expect it to do? Work? O_O.

status quo - August 12, 2010, 10:48 am

(Aug 12, 2010 09:56 AM)Sharkey Wrote: [\[CITE\]](#) Figures. Only give it a 5/5 because you get it free.
Correction, the reason I MADE a review is because I got it for free.
The review it self has NO bias opinion what so ever. It's actually the best keylogger on this site by far. Emissary' v4's features are a joke compared to this beast. It's like comparing the Laker's to the Timberwolve's .

You can easily login to your msn again because all the freezers is nothin more than failed logins every second an msn is "freezing" your acc for safety reasons (bruteforce). Just go to hotmail, enter you mail and pass, enter the captcha and login!!! ?

Samuell - August 12, 2010, 1:55 pm

Sorry to hear that :(

But I am so relieved that i purchased this product yesterday, this key logger is definitely an amazing product and would recommend anybody to buy it.

It's very user friendly, but if you cannot figure out what each and every feature of the keylogger does you can even ask him for tips/setup help :)

5/5

-Amazing

zSwag - August 13, 2010, 8:56 am

Hello Zachary, I have some important business inquiries I would like to speak to you about.

Signed,
Kevin

Samuell - August 13, 2010, 11:36 am

Kevin stop with the bullshit -_-...

I'm back online everyone, using a different paypal for now ><.

zSwag - August 13, 2010, 11:47 am

1) Numerous friends and customers I have dealt with reported that this keylogger does not work after someone restarts their computer. I have tested it numerous times with Windows 7 64bit & Windows XP 32bit. It did not work on either of the two, even with the function, Add to start up enabled. All my friends & customers I have dealt with have lost most of their victims.

2) The infected person lags heaps right after he clicks on the infected file. It is quite obvious it's a virus even if nothing pops up. The person has mouse/text lag. I have also tested this numerous times. It lags on all my computers. He claimed to have reduced the lag, but the person still lags heavily. This clearly defeats the purpose of stealth.

3) Most of the functions advertised are either bugged or semi-work. Such as the features LAN spreader & USB spreader. I have tested this with many blank USBs. He has stated himself that they "may" work. Why would you advertise something that is bugged?

If you want a keylogger that will not randomly lose your victims then I recommend not buying this. I have lost around 15 victims simply because they restarted their computer.

I have now purchased a new keylogger and I would like to say that it is working fine. I am glad I moved away from this keylogger. Goodluck Classical with your future coding & your product.

That is my two cents,

Signed,

Kevin.

Samuell - August 13, 2010, 11:59 am

Thanks for flaming my thread kevin.

1.) You're refusing to send me the money I made from this program.

2.) You've blocked me on MSN.

3.) You just lost a 2-year long friend over \$100 or so in paypal, how do you feel kid?

Also, why is it working so well for everyone else then?

P.S. You bought another keylogger with the money I made from the sales on this keylogger? You're a joke. Not to mention you spent ~\$500 of the money I made in the past on a laptop without even asking me.

Sage Mode - August 13, 2010, 12:06 pm

Well you seem to think you're pretty untouchable, blocking me won't serve you any good. Hiding will not work, I control your life atm.

Signed,
Kevin.

You're not blocked, my MSN is frozen smart ass...

zSwag - August 13, 2010, 3:29 pm

Why'd you go off ventrilo when I started talking to you? Be nice, you know I love you Zaccy Zaac <3

I can't get on ventrillo my internet is ddosed... I'm on my phone at the moment.

zSwag - August 13, 2010, 3:40 pm

Any clue who is doing it?

Samuell - August 13, 2010, 3:42 pm

I wish I knew.. Probably the same person who is freezing my MSN.

zSwag - August 13, 2010, 3:50 pm

Mmmm, lol. I think I have a clue. Can't be me though, I'm harmless.

Samuell - August 13, 2010, 4:05 pm

Well I don't really understand what he's after...

Pontification - August 13, 2010, 4:28 pm

Kevin23va...Go fuck yourself. Leave this guy alone.

c6p0 - August 13, 2010, 5:25 pm

ok for buy this man !

me add you now msn

I'm talking to you on MSN now.

Samuell - August 13, 2010, 8:55 pm

Well I think the flame war is over, Kevin kind of won but w/e. Moving on then, I'm back online.

By the way, I got hf l33t :).

i pnuts i - August 13, 2010, 8:55 pm

This program is so amazing!!!

I have already made the money spent on it back infecting and selling accounts.

I've owned the logger for less than 24hrs!

5/5
