Thread: [free subway](#)

Vitaly - July 2, 2019, 7:31 am

seen people selling this when it's already leaked so here

1. create a Subway account with random email and random phone number. (be sure to use legit sounding names or it will not go through)
2. download version 8.4 of the subway app and install the app. (Keep app closed)
3. Put phone in airplane mode
4. Open app, take out of airplane mode and sign in.
5. add a low balance card or a low balance PayPal as a payment method
6. go to the drinks on the menu find the highest priced drink and add 500 (for \$50) 1000 for (\$100) of them to the cart
7. Place order and it will error out.
8. Press back button all the way to the main menu
9. You will see tokens get added. Log out of account and then back in 15mins to 1 hr later

Does anyone know if this works in the UK? Thanks!

Spaark - July 2, 2019, 9:49 am

Neat guide. Crazy dumb if it works.

Thanks for sharing. Would've hated to have paid for this.

SIM-2508228 - July 2, 2019, 9:50 am

Lavish was trying to sell it. I'm not saying he was selling it before it was leaked, that I'm unsure.

Disappointing... but that's Lavish Living for ya.

He's always interested in sniping a quick dollar... one of the quickest HF Vendors imo. (not really a good things for integrity tho)

What about that/this is disappointing Spaark? I didn't know the method was leaked until this thread was posted on hackforums and then I immediately switched from sellign the method to selling just premade accounts.

Instead of talking shit about me in this thread why not discuss on discord you snake

Integrity? Lick my ass, fucker!

Oh shit.. It's kinda ridiculous how big of a mistake these companies can make.

Kaleb - July 2, 2019, 4:48 pm

Doesnt work as far as I can tell. Got a card added with low balance but its denied when I place an order. Backing out to menu doesnt give tokens. On the right version.

Yeah It looks like it's patched. The website top corner says my balance is 45100 tokens, but my meter on the dashboard says 100 points.

Your meter would never show more than 200, every 200 points it awards \$2 in credit and resets the meter to 0
