Thread: [BTC Analysis : Bull VS Bear. Who's Stronger ?](#)

hi_man - July 3, 2019, 10:08 am

Speculation about BINANCE:BTCUSDT is always confusing for a new comer to understand what is going on in the market ? To be frank, that's make this amazing cryptocurrency a pain in the @ss for traders. You can't predict what's gonna happen next.

From my analysis, I believe there are two possibilities, Bull Run and Bear run

>>BEAR RUN

If the Price breaks down the line then On 1h Chart, BTC is likely to print Gartley pattern .

Most likely breakout level is around 10890 - 10750 (1.618) , If this level is not tested then it must lie between 10300-10460.

>>BULL RUN

BTC is heading towards third wave so if bull run is stronger to destroy gartley pattern then it will go up as it is going.

Not gonna lie just reading this, it would be awesome if bitcoin decided to run upwards on 4th of July

SIM-3871390 - July 4, 2019, 11:34 am

More likely to break 12k & Pump IMO but not betting on it

Should pump atleast \$400+ if it does.

Yeah waiting to cross 12k mark. I see another harmonic pattern on the chart it will down lil bit then pump up

Should pump atleast \$400+ if it does.

It reached above green zone. So yeah retracing now. Move is soon upward or downward

Omniscient - July 4, 2019, 3:51 pm

BTC will be hitting \$20k+ either this month or next.

Do you think ALT's will get much of the momentum?
