Hi there,

Looking to grow your server with more players? But not enough players? We offer you a full automatic voting service with our vote bot!

Toplistbot is a 24/7 fully automated voting service to get your server more attention on toplist! 1.750.000 votes sent already using our service with over 2000 customers!

Not convinced? Get free trial votes on our website.

The benefits of this service are:

You don't need to worry about proxies, we use expensive residential back-connect proxies to make sure it looks like it's a real user. We vote with the same cookies, browser settings, and username every time to look like a legit user. You don't need to worry about vote removals, we guarantee 100% votes on the top list. You get access to the user panel, you can pause, start, set a new link, or change the voting speed at any time of the day! We offer a live chat and ticket system on our website, with 10 hours of support a day

We've done a few updates:

1. You can now use presets to buy votes quicker
2. You can buy previous orders again with a click of a button.

Let me know any other feedback,

Thanks

What is the price rate for this?

What do you exactly mean? Every website has its own price rate, you have to check out the website for the exact prices.

What website you looking for?

Got some awesome updates to share with you.

It's now possible to buy tokens, the more tokens you buy. The cheaper the price will be. You can remove and add tokens to any order at any time. Don't like one investment? Then try the other voting website. Ideal when you don't see enough traffic coming in to try another one.

It's also possible to subscribe monthly now to the orders to get all your orders monthly on time without any effort.

There's also currently a small discount going on, 15%.

dormic - July 22, 2019, 10:34 am

Hurray! It's now also possible to buy tokens using PaymentWall, this includes many payment processors that we weren't able to offer you!

Paymentwall includes credit cards like Bancontact, e-Wallets like: Webmoney, Aliplay, WeChat, Bank transfers like: iDeal, Belfius, Prepaid cards like: Mint, Neosurf, Necard, Cashbee, mobile and phone and many more!

This is currently only available when you buy tokens. You can use these tokens to transfer to real votes or transfer it between votes.

We've now implemented a new way of ordering your votes. Just by selecting the votes you want at the top of the page, you can edit/delete things from your order and immediately checkout.

We looked closely at how our users interact with our sites and this was a very important thing to fix for us.

We've also reached the 2.500.000 votes milestone.

It's the start of a new month! Be sure to get ready for your votes for this new month!

We've updated our proxy provider, we now only vote from Europe and the US residential proxies. This means no china or india addresses.

dormic - August 13, 2019, 12:34 pm

Amazing news! It is now possible to choose your own countries to vote from! Very handy when you want to be sure that your votes won't get removed.

Here's an image of how it looks like

I have to say that this service is running really well.

Looking for votes? Don't hesitate. We offer a discount when over 20 dollars is purchased. Up to 50% when you buy a few hundred tokens.

dormic - October 15, 2019, 10:28 am

It's currently now also possible to vote with a certain list of username.

This will make it more legit, especially on the minecraft websites, because sometimes you have options to share all the users that have logged in on there, and this will vote for all the players that are not voting but are playing your server.

News!

Anyone that has recently purchased via PayPal has received 10 free tokens worth 10\$ as a christmas gift to use on our service!

We have also completely redesigned our user panel
