I dont want users of the wallet to know that its being sold and move their funds in panic, The transfer will be done and its up to the buyer to notify the users its being sold. Its up to the buyer to decide if he wants to do this or not.

Sent you a PM, That should explain the price a bit better. The other venture i told you about has a wallet built into it, so i would be focussing on that more than this..

Mind sending me that too?

I don't see why you would sell for so low when you made more within the first week.

Launching a very large crypto exchange site, With lots of money being pumped through it and has its own built in wallet. This is no longer needed for me, and i might aswell pass it onto someone else that can enjoy the profit.

Let me have a look, I'd love to own something like this.

User is selling something that's involved in a possible scam, Watch out. Site is made from a premade template and user asks people to go to his site and deposit btc.
