Thread: [Windows ISO](#)

dwalael - July 5, 2019, 1:59 am

Where can I find an ISO file that will work with virtualbox?

SIM-3257834 - July 5, 2019, 2:03 am

Any ISO would work with virtual box. Get the iso from Microsoft.

Vuln - July 5, 2019, 2:04 am

What OS/Distro?

For Windows you can use

<https://developer.microsoft.com/en-us/microsoft-edge/tools/vms/> or
<https://developer.microsoft.com/en-us/windows/downloads/virtual-machines>

HOMODIN - July 5, 2019, 2:08 am

If you just want a Windows 10 iso then you can make one with [Microsoft Media Creation Tool](#).

Bipo - July 5, 2019, 7:22 am

The ISO you make with windows media creator don't work any more , you will have OOBIE error .
you will have to find a old version of windows 10 and make all the update .
