Thread: [ScanHaven.com \[Runtime + Scantime | 40 AVs | PAFish\]](#)

ScanHaven - July 5, 2019, 4:44 pm

ScanHaven is a web service which provides dynamic runtime and scantime analysis of a provided file, all-in-one scan.

At ScanHaven, you can scan your file on 40 fully licensed anti-viruses which include DAILY automated database updates, so you can be sure you will always get the latest detections from your scanned file with minimum false-positives due to our strict configuration policy.

All our anti-virus systems are set up to look like real machines so you will not need to worry about virtualbox detection [5cm.ru/view/i7/0iuc.png](#)

Each anti-virus system is also configured to look like a real machine with all default software installed, including:

- Internet Explorer
- Firefox
- Chrome
- Adobe Reader DC (PDF)
- Microsoft Office 2016 (PPT, WORD, EXCEL)
- Notepad++
- .NET Framework 4+
- VC++ Framework (2005 - 2015)
- Adobe Flash
- Java Runtime (JAR)

You will be able to set specific options for your scan like seen below [i7.5cm.ru/i/8l6i.png](#)

- can set scan interval 60, 120, 180 or 240 seconds
- can set internet connection to allow/deny (enable/disable adapter)
- can log runtime results with DebugView (scantime detections will not track DebugView and no global win32 capture to reduce garbage results)
- Option to remove Zone.Identifier (Alternative-Data Stream)
- Option to enable autorun for macro-enabled doc* files
- Option to disable UAC for the current scan
- Option to move mouse during scan (Anti-antivm mechanism)

In the scan result you will find information about the scantime & runtime detections, as well as images which show you the file/anti-virus behavior throughout the whole process.

#2 [i7.5cm.ru/i/TbTZ.png](#)

We provide 4 simple tariffs which you can find information about here [scanhaven.com/plans](#) - all users who have a recurring plan will have access to API. On the other hand, per scan does not allow you to use API, but all plans allow you to change scan options and use all 40 antiviruses without restrictions!

You can learn more about our service scanhaven.com

You can read all of our testimonials from happy customers forum.exploit.in/topic/154262/

Fuck me, LQ Post, Joins forums and buys L33T. Doesn't even bother reading the thread.

Retard alert.

OT.

Very nice, Ill be using this over the coming weeks. Has delay been extended?
