Spoiler [\(Click to View\)](#)

Step 1: Pay the retainer on a good lawyer who deal with cybercrime

Step 2: Learn to fight

Step 3: Learn to kiester

Step 4: Get some dope to kiester

Step 5: Hack

Step 6: Get caught

Step 7: Go to jail, this is where steps 3 and 4 are useful now you have instant money buy liquid soap and when that money is gone go to the shower and drop the liquid soap then pick it up it'll take a while once again you will have money.

You basically are engaging a mature organization NOT some random at home user who believes that computer run on smoke and magic. It's a bad idea and won't turn out well.

I couldn't have said it better!

OP: Stay in school and study!
