Thread: [NEW PC & MAC MINING SITE! 1000 FREE SATOSHI SIGN UP AND CPU & GPU MINING](#)

TheLostCarlos - July 8, 2019, 10:10 am

[Honeyminer - Signup Referral](#)

We're a group of entrepreneurs, security experts, and crypto enthusiasts that believe decentralized systems and blockchain technology will improve the lives of millions by building a new, fair and equitable financial ecosystem. However, we realized that better tools are needed to make this ecosystem accessible and safe for everyone. We set out to build Honeyminer to enable everyone to contribute equally to this revolution; and to make it secure enough to run on your personal computer, your mother's computer - or your entire cluster of mining rigs. Thanks for joining us in the journey - and lending a hand building a better decentralized future. Proudly based in Hoboken, NJ, right across the river from NYC.

Our mission

We are building Honeyminer to be the very best mining client in the world. Available to everyone.

Our belief

Today is Day 1 for the Crypto ecosystem. Together, we are rewriting the world's financial systems - and making it a more fair and equal place.

Our promise

We focus on the long-term over any profits we might find in the short term. And we try to improve Honeyminer weekly.

Our way

Everything we do revolves around our community who chooses to mine with us. We make bold rather than timid investment decisions to make Honeyminer the very best.

Technical Leads

photo_11.png

Larry Kom

Larry is a software engineer and manager with 20 years of internet-related development experience. His areas of expertise include security, auditing, scaling, real-time data, crypto-currency, and high-risk financial systems. Larry is a Certified Fraud Examiner (CFE) and a PhD Candidate in Policy Oversight at John Jay College in New York City.

photo_06.png

Tony Jazak

Tony is a Full stack web developer with over 20 years engineering and design experience. Focused on new technologies and their applications at production scale with enterprise standards. Currently leading and advancing real-time scalable Node.js development, NoSQL offloading, and front-end Linux, Apache, MySQL, and PHP development.

photo_08.png

Jing-Yeu Miaw

Jing-Yeu Miaw is a C++ programmer with experience in operating system APIs, hardware-level

optimizations, and low-fingerprint high-yield computing. Prior to working on Honeyminer he spent 8 years working on developing low-latency trading systems. He holds a M.A degree in Computer Science from Columbia University.

Team and Advisors

photo_02.png

Noah Jessop

Noah Jessop is crypto investor and early stage venture capitalist at Founder Collective in San Francisco (proud investors in Uber, The TradeDesk, BuzzFeed, Cruise, Civic and many other world-changing companies). Previously, Noah was the CEO of CommandIQ, an enterprise software company acquired by PCH in 2015, and studied Mathematics at MIT.

photo_12.png

Jeremy Avin

Jeremy is a product-focused executive who is VP, Product at Common, a shared housing operator with \$65m in funding and an advisor at 8VC, a leading Silicon Valley Venture Fund. Previously he held lead product roles at Machine Zone, makers of two of the top grossing mobile games ever and at Publishers Clearing House, the iconic chance to win brand.

photo_14.png

Brad Hargreaves

Brad is the founder and CEO of Common, a shared housing operator with over 20 buildings under management in five cities. Founded in 2015, Common has raised over \$65 million. Previously, he co-founded General Assembly, a global education institution that was acquired by The Adecco Group (SIX:ADEN) for \$412.5 million in 2018.

photo_07.png

Jennifer Smith

Jennifer Smith is VP of Business Development at Thunder, a new scalable blockchain. Before Thunder, she was at Greylock Partners, a leading Silicon Valley venture capital firm. Previously, she was a team lead at McKinsey & Company. Jennifer graduated summa cum laude from Princeton and holds an MBA from Harvard Business School.

photo_09.png

Jason Comerchero

Jason is a Co-founder and Managing Partner of Wolfswood Partners. Jason is focused on investing in technology including robotics, crypto assets, augmented reality, and artificial intelligence. Private investments include Bizly and Handsome Brook Farm. Jason graduated from George Washington University in 2001.

photo_15.png

Drew Oetting

Drew is a founding partner of 8VC, a Silicon Valley VC firm that manages over \$1.5B. Prior, he was the chief of staff to Joe Lonsdale, founder of Palantir, OpenGov and Addepar. Drew is also a co-founder of Affinity Technologies and serves on the competitiveness counsel of Cerberus Capital. Drew received a BA from Claremont McKenna College.

photo_10.png

Greg Neuman

Greg is a Co-founder and Managing Partner of Wolfswood Partners, where he focuses on healthcare and blockchain investments. Before founding Wolfswood, Gregory was a healthcare portfolio manager at Alpine Partners. He graduated from Georgetown University in 2005 with a major in Government.

photo_04.png

Coinyeezy

Coinyeezy is a Twitter influencer, product builder, and entrepreneur. In addition to working on Honeyminer, Coinyeezy founded and advises many projects including Crypto Aquarium, Whale Bot, Coindex, Whale Reports and Pepe Dapp. Yeezy has a background in software product management and graduated from Purdue University.

photo_05.png

Crypto Randy Marsh

Crypto Randy Marsh is Twitter influencer, product designer, and entrepreneur. As the founder of Crypto All Stars, PepeDapp, Dapplife and other blockchain projects, Randy has established himself as a knowledgeable advisor, marketer and product builder. Randy has a background in graphic design and graduated from Penn State.

photo_16.png

Notsofast

Notsofast has striven to set a good example for conduct in the Wild West of the cryptocurrency space. He has become, despite pseudonymity, widely known as a friendly, knowledgeable figure providing positive early experiences for all new cryptocurrency users since 2013.
