Thread: [Made \\$300 in two days](#)

J FX - July 10, 2019, 1:32 am

Made \$300 from ewhoring with the money split between cashapp, bitcoin, and agc.

Been thinking about it and i'm not going to work for a company only making \$10 an hour and slowly wasting my life away. I want to be my own boss and work whenever I want to. That mindset has been working for me and i've been on the grind. This upcoming week ill be making atleast \$200 daily and it'd only going to get better as time goes on.

And if anyone's wondering, i'm ewhoring through snapchat

That's really not a lot considering most normal people in this world make that much or more. Most I made in 1 day was 800ish and I'm not 18 yet, I'm assuming you're not either. Move up to those levels before you brag about something anyone can have. Not saying what I have is incredible I'm just saying you have a weak flex. =^)

gl with this just remember ewhoring isn't passive income maybe that \$10 job is just a better alternative + ewhoring on top is more cash flow then just the one source of income

Ignore anyone bashing your grind. I can tell by the way you spoke you were not BRAGGING but more or so just being proud of the work and lifestyle change you made. Keep working. Don't worry about someone else and their path because that just takes away from you. Fugg the haters. Keep going :)

Congrats man! This is the great thing about finding something like ewhoring, realising the flexibility of it and the potential earnings. Let me give you a little advice though, and feel free to ignore it of course, but try to consider ewhoring as the hobby and not the job. If you make it your sole source of income, you'll find it more and more laborious, and will find reasons to do other things till it gets harder to earn. Do it alongside something else, maybe even a 9-5 or a part time job, then you'll always have a sure fire stream of income, and flexible potentially higher earnings.

can u pls send me pm how? i struggle 5 years (24hr a day) to make money online pls op

Congrats on the initial earnings, but don't discount getting a legit job too, I'm making a decent amount more than \$300 in 2 days working as a software developer plus job security and CV skills.

I'm not discrediting the money you've made because honestly congrats it's a tough market these days, but you could get a real job and keep doing it for maximum profits ;)

J FX - July 16, 2019, 1:34 pm

I'm not going to make ewhoring my main income but more of a side job to have a little extra cash. I

put my 2 weeks in to my current job and actually starting my new job next week making \$15 an hour.

So with my new main job and ewhoring on the side i'll be bringing in a decent amount.

I see E-Whoring in snap-chat is still profitable .

How long have you been doing this?

Congrats though

Voxi - July 21, 2019, 7:45 am

Never quit your IRL job to E-whore, its not a stable income. Make sure not to blow the money and invest it.

smokesleeprinse - July 21, 2019, 8:53 am

Now that you make decent coin from e-w, what would you do differently when you first started?

FYeah - July 21, 2019, 2:54 pm

Great earnings, but my advice would be to not make ewhoring a job. Take as much money you can from it, and invest it in something more long term and sustainable. That's what I do anyway..

Most people don't make that much actually. Most people barley make \$100 after working a 10 hr shift.

Average wage data is also skewed because it's the entire population. So the millionaires mess up the stats.

And that's in the US much less in less fortunate countries. If someone from say, the Philippines or Brazil made \$300 in one day, they'd be set for a month.

Don't discourage people from doing well. And stop being the cliché teenager who "used to make bank" because people who used to make bank, never stop making bank.

Damn scrub. ?
