Huber.Graphics

Freelance Graphic Designer

WHY ME:

I'm currently trying to get into freelancing as a graphic and web designer.

I've chosen to pursue working in the graphic & web design industry since it intrigues me and has drawn me in like no other industry. I've worked in one media agency as a web & graphic designer and in one television station primarily as a cutter for trailers for TV-Series.

In these companies I learned how to communicate well with coworkers and how to address customer concerns in an empathetic manner.

I'm looking forward to another opportunity to improve both my skills and the project I work for.

WHAT DO THE WEBSITES OFFER?

All pages will be based on Wordpress or Webflow, depending on the project.

CMS Function, E-Commerce Function can be added on every project.

All websites can be hosted on your own server or separate servers for your site.
