Thread: [how to evade google chrome security and send a batch file and yeah the win defender ?](#)

cyborg088 - July 11, 2019, 10:00 am

Hi Guys,

I wanna know is there any way to bypass chrome security and send a batch file to other network without being caught by win defender ??

Any help will be appreciated.

Thanks.

cobaltstrike - July 11, 2019, 10:23 pm

somehow I doubt you have anything very interesting in your batch script so you can probably just change the extension to a .txt.

window's amsi vs. poorly written batch script

rip
