Thread: [Botnet Setup - VPN Installation - Web Development - Linux Configuration](#)

f\_esunaga - July 12, 2019, 8:38 am

Server Administration - Tools Installation - Web Development - Linux Configuration

Can you guide on getting a perfect hosting/server for your business and help setup it according to your needs, optimizing the host for the best performance

## Web Development/Designing

- 1) Wordpress Development/Designing
- 2) Woocommerce Development/Designing
- 3) PHP Development
- 4) Node.JS
- 5) HTML/CSS

Responsive Web designs using latest technologies and frameworks & Developing Stable Backends

## Server Side Services

- 1) Virtualization
- 2) CPANEL/WHM Configuration
- 3) Installing Virtualization panel & connecting to WHMCS ( Custom Build / Paid / Non Paid )
- 4) Custom Virtualization Environment
- 5) Botnet Installation & Configuration
- 6) Other types of scripts installation and configuration ( VPN SETUP, GAME PANELS , SMM SETUP ETC )

Responsive Web designs using latest technologies and frameworks & Developing Stable Backends

I can also configure your server with firewall such as OVH or Voxility filters, to make your server more protective under attacks, You can contact me for free of cost consultation of work regarding web development or server configuration & for my portfolio.
