Hi...

I'm looking for the next best thing in Bitcoin exchange after Quadrigacx.
I want to be able to send my fund to any wallet.

Who has time to list 100+ exchanges?

I never even heard of Quadrigacx.

The founder of the company was "killed" and no one had access to the bitcoins in the exchange.

lets also mention the fact that a few weeks prior to his death , for SOME reason, he decided to change his will, and decided that if he ever died, his wife would get all of his assets/property.

and the fact that the death certificate mentions "Gerald Cottan" instead of "Gerald Cotten"

Quadrigacx is the canadian dude that died and no one can access the millions of dollars in BTC of his exchange because he had the only login.
