Cant say in public.

Theres a moron newbie harassing me and wanting to steal my shells via screenshare lmao.

This moron

DWC,

user isn't able to prove he has these. Doesn't want to screen share, doesn't know root holds log files & isn't aware that "cloning" a site would end up in it being a static site.

LOL.

-----

Calls me a "newbie" when he doesn't know anyone or anything from the hacking scene which has been existant since the early 90s. Anyone with shell access to these sites would know at least DG. Skid detected.

LOL.Called it.

I told him I can do a video record of my phone and censor part where shell is hosted.

Kiddo wanted the logs and website files.

Uh, how else would you prove it? A shell looks very much the same on sites. You fail to realize this. You're a simple minded, 3rd world country retard. Just get out of here and eat a bag of dicks skid.

Sorry the guy who spoke to all hackers in the world.

?

I could show you the domain refreshing except the part where its hidden, idiot.
