Thread: [Throwback to Hackercraft - 666 Faction Base](#)

This was our old base before it was deleted. Thanks for recording it Reset, but damn your texture pack was sick. I believe it was one middle faction, and 2 surrounding to claim the water. For the server this was like big big compared to other builds.

The hackercraft times where the most amazing MC times I've ever had.
The drama on the server, the tension it caused on the forums.
It was honestly amazing.

Remember running the faction "Storm", we where the biggest faction at some point (members wise), and then we got backstabbed by someone who kept dying over and over to lose all our power, so that our faction base could be claimed by someone else.

The memories.

Also who remembers the terror base from orgy?
The huge inverted pyramid.

Cant believed I missed it.

HackerCraft should revive with the recent rebirth of Minecraft.
