Thread: [\[Follow along\] Growing an Instagram automatically??](#)

**SIM-1729678** - July 20, 2019, 3:33 am

So, for a while now, I have been wondering how far I could push an Instagram account with the use of a bot. No personal work involved (Besides setup), fully automated. How many followers can I gain? are they authentic and interactive? (For anyone coming here to tell me they won't be, don't waste your time.)

How many likes on average can I get? So I got a bot and made a new Instagram account.

Niche: Photography

I have the full package running. (let me know if I am missing something Imfao)

- Follow bot
- Unfollow bot
- Follow back
- PM engagement
- Story viewer
- Comment engagement
- Like bot
- Auto-post images

I have 100 images lined up with the same caption on all of them, same hashtags, everything. Auto-posting 4-512-20 images per day.

Let's see what the results are in the long run.

Day 2:

Spoiler [\(Click to View\)](#)

Day 3:

Spoiler [\(Click to View\)](#)

Day 4:

Spoiler [\(Click to View\)](#)

I had to change some settings, but they seem to work out great!

we are growing a steady 50 followers a day and we are almost averaging 50 likes per post! ?

Day 6:

Spoiler [\(Click to View\)](#)

I forgot to post yesterday, sorry.

We got botted, or something happened, we gained 235 followers in 1 day, which seems odd to me.

I changed some things, causing the engagement rate to go down very hard, but it makes up by

getting more likes.

The bot now posts 12-20 pictures a day, making it look like the average has gone down.

Keep updating the thread, but remove the username from the thread. Including the picture you posted with the username.

It might get reported and banned, you never know.

True. Thanks.

This is awesome! Following

I did this with a space account and got up to 5k after a few months.

I'd recommend joining an automatic power like + comment service too.

**SIM-1729678** - July 21, 2019, 3:48 am

Still growing!

Gained 53 followers and 7 more likes per post on average.

If it's Instagram, prepare to get limited and be required to prove your identity.

Ironically enough, I sent an email reply after they requested this saying "Forget it, it's too much effort, fix your security systems, I'm obviously not a bot and obviously have done nothing wrong"

To which they reactivated my account? Lol

We will see I suppose. I really don't care about the account.

I didn't think you did, but it's more of a "for future reference" thing, in case you sell this in future, I'd sell SMS verification service alongside it or something

Yeah, thanks. Don't think I will sell this either, since it's not organic at all. In the worst case scenario I would keep it myself.

What do you use, I want to do something similar to this, I like to think I have good ideas

Ahh right, it's sorta like when I first made my multi-purpose bot, some small part was sketchy so I just used it myself.

Would like to see how this ends

It's going quiet well and these are all active users which is good

I wonder if you'll get banned. I honestly hope not but i'm curious.. if there's that risk

Looks like it's going great! How many people are you following/unfollowing daily?

Instagram is getting more strict about that now.

Following roughly 600 a day. Unfollowing around 500-550 a day.

Are you using hashtags? This would be the perfect time to start ranking your page in some ideal tags. You have the potential to gain hundreds, if not thousands of followers per post.

Using some basic tags, nothing special

With Jarvee you can post stories right? Could use stories to increase engagement. Ie; like our recent posts, put us on your story for a shoutout, etc.

Correct. Thing is, the whole 'post us for a shout-out' would be too much work for this experiment (I am not lazy, it's just not in line with the experiment). Thanks for the tip though :)

Lmfao, yeah.

I have noticed a certain fluctuation in the likes I am getting, and this has everything to do with the pictures. I might actually put some work in tomorrow to filter some images and changed some caption on the posts.

Some posts easily hit 50+ likes, and others are struggling to hit 15.

Fuck, I believe I am caption banned, the bot can't post captions anymore, and neither can I edit them via mobile or website.

**SIM-1729678** - July 25, 2019, 10:27 pm

I have hit a small barrier, because of extreme here where I live (not normal) my CPU was running at

96 degrees Celsius, with ONLY the bot running, to prevent damage to my pc, and laptop, I had to shut them down, causing the bot to go offline. I will resume either today or tomorrow, when the weather is better.

I was, stupid.

-----

I changed all the images and made some custom captions, starting the bot again soon!

**SIM-1729678** - August 2, 2019, 7:55 am

Okay, so I am running against the following:

I can post a picture via my phone with captions and all no problem.

Once I post a picture via the bot, the captions get removed. fuck..

**C++** - August 2, 2019, 1:30 pm

I am doing this too! If you want to engage even more people you can simply research low hashtags you can rank on. Then move to bigger one's.
