Thread: [hack phone \(i have access to it\)](#)

y7outu1 - July 20, 2019, 10:46 am

hi,

I wanna know someone's accounts passwords Especially Facebook
since i have access to his phone it will be easy

i need some ideas to know the passwords

lynxmk - July 20, 2019, 10:59 am

Go to google accounts settings and view saved passwords. Or, Dump browsers saved password.

he doesn't open facebook from browser he uses app
is that gonna work?

Ramb0x - July 20, 2019, 11:05 am

Change a password from the app.

i don't want him to know that i hacked him

Ramb0x - July 20, 2019, 11:22 am

Searched the google and i found this:

Code The best decision so far is: Download SQLite Database editor. (Root is required!)

Go to "Application Databases" Choose : Internet (with icon of Earth and small script
com.android.browser /data/data/com.android.browser/databases/webview.db

Choose from TABLES - "password" Press SELECT*

ENJOY!!!!!!!!!!!!!!!!!!!!!!

thanks, but his phone is not rooted

Ramb0x - July 20, 2019, 11:30 am

You can try those 3 steps, using 2 devices (second must be rooted):

use adb backup com.android.browser to create a backup of browser on your device

use TitaniumBackup to restore to another device

copy webview.db from /data/data/com.android.browser/databases/ and extract password from it.

EDIT: copy/pasted

dude, thank you very much

i'll try it

MORK404 - July 20, 2019, 12:05 pm

change the password

y7outu1 - July 21, 2019, 12:18 pm

GUYS, any help here ??????

marto2013 - July 21, 2019, 9:49 pm

How can I do it with Chrome?
