Thread: [Best graphic card 2019 Nvidia GeForce RTX 2080 Ti](#)

Sliced - July 21, 2019, 7:35 am

Nvidia GeForce RTX 2080 Ti

GPU Cores: 4,352 | Base Clock: 1,350MHz | Boost Clock: 1,545MHz | GFLOPS: 13,448 | Memory: 11GB GDDR6 | Memory Clock: 14 GT/s | Memory Bandwidth: 616GB/s

Crazy numbers, only for \$1099. good price for power.

What you all think?

webdev77 - July 21, 2019, 7:38 am

I am not impressed with the price/performance ratio personally. A \$500-\$700 GPU can get you pretty much the exact same gaming experience without any perceptible difference.

I really like the look of the RTX 2060 Super & RX 5700 atm

A regular RTX 2080 can be had for <\$700, but you can also look at the Radeon RX 5700 XT and RTX 2070 as both offer far superior value with still good performance. Check benchmarks to see what the actual differences are. 100FPS vs. 115FPS is completely unnoticeable for pretty much all games.

It's incredible that there is only a ~15% increase in performance for that much of a price hike.

I think 5700 XT is going to be MVP when partner cards come out.

I just researched that. looks promising.

karim0102 - July 23, 2019, 11:27 am

I really like crad ati amd rx
