Thread: [\[AUTOBUY\] THE PICADOR SYSTEM - PREMIUM FOREX TRADING TEMPLATES AND INDICATORS](#)

ForexPicador - July 22, 2019, 6:13 am

Test the strength of the bulls and get REAL, LIVE, TRUE signals with these templates and indicators. The template used is pre-programmed to utilize various tailored indicators in order to provide you with an accurate assessment of trend direction.

By using the template directed in instructions received, you will be able to identify the session high (easily) for shorts and the session low (again easily) for maximum entry points. It uses a combination of 3 specific concepts/theories (murray math lines, elliot wave theory and fractal harmonics).

ALL of the work is automated, you just need to manually enter your orders. It does help if you have a working knowledge of the principles this system is designed with and will make it much easier to make money. If you don't have previous knowledge, it is very learnable with some effort.

For ONLY \$65 more you can receive mentoring from myself, see the "Matador Mentorship" [here](#).

With the purchase of this product you will receive a .zip file containing:

- 1 Template Folder (containing over 20 custom templates, with specific ones being the exact same system I personally use)
- 1 Indicator Folder (containing over 50 custom indicators, tailored towards the overall automated system)
- 1 document with complete setup instructions

Requirements:

- MT4
- Any brokerage account (demo or live)

Learn more and purchase here: [SHOP](#)

[contract=tid]Start Contract[/contract]

Feel free to message me if you have any questions, I'm happy to help. These indicators/templates are well worth more than \$100...
