This thread is kinda useless there are p2p exchanges where you don't need to enter your private data. Everyone can exchange crypto anonymous on p2p exchanges.

The fact you took the time to right that makes me smile :) free bump <3

but to answer your opinion. Using other exchanges still log your IP and other info such as email etc when using me nothing is logged at all.

Salon0503 - September 1, 2020, 5:18 am

Holy shit they log ip and email, grow up man not everyone is that stupid. Btw he gave me negative reputation, I think he's pissed because he's selling free shit lol.
