Thread: [Is there a market for PUBG Mobile 100% safe cheats?](#)

Zombie [?] - July 24, 2019, 9:56 am

Would people buy it? If you are into this game, Let me tell you, I am not talking about public GameGuardian garbage scripts. I am talking about Premium ESP which is 100% safe to use. Works on rooted android phones.

Please let me know what the community thinks.

I saw more than 500 players have a high k/d like 30 or 40 and reached conqueror on high level account and they are still safe with no ban, also many of them hacking from season 2 until now,,,,, I think they have anti ban secret

VisualSoft - April 14, 2020, 5:02 am

Yes there is a very high demand for pubg cheats I've seen many people selling premium hacks for every season. I'd like to buy it for a reasonable price.

I know there are many cheats for pubg mobile but what a cheat can you play with it from season 2 to season 12 with no ban !!!,,, you can check top 500 ranked player, most of them are hacking and have more than 30 k/d on high level account like level 72 playing from season 2 and still safe,,, I wondered what a hack can do this >>> I found a professional hacker has a secret anti ban but the problem I can not reach for him

If you cheat you'll get banned eventually some hacks do work for few seasons but not for very long. I've played pubg many times using cheats but trust me once you watch live tournament like pmco or other you'll stop cheating because players are very good they can even spot enemy from long range and pubg can make you money if you have skills search youtube people are making bank off of pubg game.

check this one, and also there is another one for RoxySmith called Roxy revoke glitch and she has a prof video for it and it really works

if there is no secret anti ban, then how can a 72 level account with 40 k/d from season 2 and still be safe !!!!!

Hi it's been a long time since I replied to this post I have a lot of things to share

I became a premium hack seller in 2020 and sold a lot of hacks all the year in 2019

I was making my own lua scripts for pubg mobile and it was working as hell I reached #9 on asia server and played with hacks

pubgmobilecheat - *August 22, 2021, 4:57 am*

I used vnhax pubg mobile cheat few years ago. It was free and it was good. There was a paid version which included couple of more features like magic bullets. So it would be nice to see both free and paid version with different features set.
