PLAYERUNKNOWN'S BATTLEGROUNDS // Full Cheat Source! (+ bypasses & updates!)

After not being able to find a good Chinese distributor for our high-quality cheat we stopped selling and we are now selling the complete source, you'll receive the following upon purchase (+ some information)

- Completely coded in C++
- Xenuine Bypass
- BattlEye Bypass
- Xigncode Bypass
- VMProtect Licensing System attached
- Interlal
- Customizable Loader (for potential resellers)
- Professionally made thread design for potential advertisements

Here is some information regarding the features coded into the cheat:

- pSilent (with FOV ring for legit look)
- PlayerESP (bones, box & health)
- Bone Selection (on key)
- Instant Hit (rage feature)

Here two features to prevent statistical analysis bans:

- Randomized direction vector on the surrounding selected bone (doesn't aim for one spot on the selected bone, but randomized spots)
- Auto-Miss (misses bullet shots automatically)

We can also update this for you every single time a new update hits for a certain amount of money, not sure how much.

?

How much are you looking for price wise?

myg0t_Andrew - July 25, 2019, 8:23 am

Nice user who knows what he is doing

myg0t_Andrew - July 27, 2019, 3:48 pm

Bump, still selling this.

Worthwhile investment. :)

Would you be interested in joining a well-known cheat provider with this? Do you have a telegram

account (or discord) so I can contact you about this?
