Thread: [Spymax client lost connection after restart](#)

samfischer - July 25, 2019, 8:59 am

Hello, i ve tried spymax 2.0 on my Galaxy S9 , but after a restart, it doesnt reconnect to the server. Only if i start the app manuel again, its working.

Does it depends on energy safe mode?

Mate what's the fix? :D

I'm currently using your fixed version of SpyNote, but i would like to know if this the fix if this ever happens to me :D

You have to add the apk to the persistence process thru the shell command

I can't pm you, please pm me with your discord

Hidden Root - February 26, 2020, 8:08 am

Use android tester 6.46 its best its the midedd version of spynote 6.4 its has good stability, good performance, opensource.

I used to provide fud android service i can fud almost any android rat, i can bypass device security, play protect security, antivirus, Knox Security
